

WOULD YOU LIKE TO SAVE UP TO 20% ON YOUR MONTHLY ELECTRIC BILL?

Temple Emunah is proud to partner with Sunwealth Power to offer you the opportunity to save money with

COMMUNITY SOLAR

WHAT IS COMMUNITY SOLAR?

Community solar is an exciting option for renters or other residents that can't install their own panels. Subscribing to a community solar project offers the opportunity to save money while supporting renewable energy in your area.

With community solar, a large solar system exports the electricity it produces to the power grid. Community members then share the benefits of this solar system by purchasing portions of its power.

HOW DOES COMMUNITY SOLAR WORK?

You can opt to purchase a portion of the power output from a community solar system. Solar credits representing the energy produced from your portion of the solar system are then applied to your monthly electric bill. These credits are purchased at a 25% discounted rate, meaning that you will pay less for electricity each month.

HOW CAN YOU SIGN UP FOR COMMUNITY SOLAR?

The solar company, Sunwealth, makes subscribing to community solar easy. Sunwealth will help match your energy usage to the energy produced from a portion of one of their community solar systems.

WHO IS SUNWEALTH?

Sunwealth is a clean energy investment firm on a mission. They work with local solar developers and investors to finance, build, and operate high-impact solar projects. Sunwealth believes that everyone has a right to engage in the clean energy economy and realize the benefits of solar power. Sunwealth's solar projects can be found on homes, schools, houses of worship, and more. They are excited to help you save money and support renewable energy.
